DPD-1543-61

15 March 1961

25X1A

MEMORANDUM FOR: Acting Chief, DPD

SUBJECT : Transmittal of Weather Study for [redacted]

25X1A

The attached study, "First Estimate of Low Level Winds Over Cuba (Spring and Summer)," has been prepared in answer to [redacted] request. While quite brief and general in nature, I believe it represents the best answer that can be given without a thorough statistical analysis of all available wind data from the area. Such an analysis would have to be performed by the Air Weather Service Climatic Center and would require approximately two months to complete. However, I believe that if presented with the whole problem, I can provide a satisfactory answer to its meteorological aspects without such a study.
